

ACCREDITATION COURSE

fas PRO

26th – 27th May 2023
Copenhagen

Take into consideration and learn how to put the teeth and bite into a stable condylar position when aligning teeth in order to get an occlusal stable outcome.

Aimed at Orthodontists and Dentists with experience in orthodontics with aligners, the FAS PRO accreditation course will provide you with the security and ease necessary to make the most of the digital tools provided by the FAS Aligner System.

The PRO accreditation will also unlock the online software and allow you to make changes to the Occlusal Design proposed by the planners.

PROGRAM DAY 1
